

# DETERMINING TREAT VALUES

1

**Have many treat options cut in small pieces.** Offer your dog a choice of two (one in each hand). The chosen treat graduates to the next round!

**Keep a ranking of your dog's**

**favorites!** The highest value - the treat your dog does backflips for is what you'll use in your hardest scenarios

2

3

**Use lower value treats for easier criteria.** Some dogs are willing to work for their kibble indoors but you'll need hot dog / steak once you go outside!

**Dogs like novelty too!** It can be useful to change up your treats regularly to keep your dog engaged & enthusiastic to work!

4

*Treat examples: hot dog, cheese, steak, boiled chicken, beef liver, soft/chewy/stinky treats. (Milkbones aren't usually palatable enough!)*
